

1. In 1925, it moved into a group of starkly rectangular glass and concrete buildings in Dessau. Outstanding staff members included the Hungarian painter Laszlo Mohaly-Nagy and the Swiss painter Paul Klee, as well as American Oskar Feininger. It was based off principles of English designer William Morris that arts should meet the needs of society, and there should be no distinction between fine arts and practical crafts. Modern art must be responsive to the modern industrial world. FTP, name this design school, founded in Weimar by architect Walter Gropius.

Answer: Bauhaus

2. The formulator and namesake of this physical law died fighting in the Gallipoli campaign of 1915. The law states that the frequencies of the K-alpha emission lines of elements are roughly proportional to the square of the atomic numbers of those elements. FTP name this law dealing with x-ray spectra.

Answer: Moseley's Law

3. By the time of the Great War, soldiers took this classic into battle with them, and it is said that a copy deflected a bullet from a soldier's heart. Its author would have appreciated this, as one poem claims the Patent officer had "lost for everlasting / The heart out of his breast" due to a rejection by fellow Oxford undergraduate Moses Jackson. FTP, name this first volume of verse by Alfred Edward Housman.

Answer: A Shropshire Lad

4. During his reign, the Byzantine armies, with the help of the great general Belisarius, successfully reconquered Italy and Africa for the Empire, and the Hagia Sophia arose in Constantinople. His wife, the actress Theodora, became a powerful empress and was one of his most trusted advisers. He wasn't overly popular though and the Nika rioters almost overthrew him in 532 CE. FTP, name this man, perhaps the greatest of the Byzantine emperors.

Answer: Justinian I or Justinian the Great

5. He has seven sons and three daughters, seven thousand sheep, three thousand camels, five hundred yoke of oxen and five hundred she asses. However, all of it was lost in the span of about one day. Despite it all, he never blamed God. For 10 points, who is this Biblical figure, a man who sinned not, nor charged God foolishly, despite these tragedies.

Answer: Job

6. This circa 1637 painting's theatrical appearance can be attributed to the fact that the artist worked out the scene by moving clay figurines around a miniature stage-like setting until it looked right to him. He placed these strongly modeled figures, which appear frozen in action, before reconstructions of Roman architecture that he believed to be archaeologically correct. The stoic and almost religiously solemn figure dressed in red at the upper left is Romulus. On display at the Metropolitan Museum of Art, New York, FTP, name this Nicolas Poussin work depicting accounts of Livy and Plutarch regarding the acquiring of females from a neighboring population to ensure the future of Rome.

Answer: The Abduction of the Sabine Women or The Rape of the Sabine Women

7. In 672 AD it was part of the Crivijaya Kingdom. Later, it belonged to the Majapahit Kingdom for 200 years, until 1520. In the last quarter of the 16th century, the Portuguese overthrew Sultan Baabullah of Ternate to gain control of the island. It wasn't until May 28, 1974 that Colonel Fernando Alves Aldela allowed people on the island to form their own political parties. FTP, name this island, whose eastern region has recently appeared in the news worldwide.

ANSWER: TIMOR (accept East Timor before "eastern region")

8. The play begins in an orchard, where Charles, a wrestler, is hired to kill the younger son of Sir Rowland de Boys. He fails, but the son is driven into exile by Duke Frederick, along with the daughter of the previously exiled Duke Senior. When that daughter and her friend Celia see bad love poetry carved on trees, they know her love is returned, but in the guise of Ganymede, she pretends to cure him of lovesickness. Other characters include the philosophical Jacques and the fool Touchstone. FTP, name this Shakespearean comedy centering on Orlando and Rosalind.

Answer: As You Like It

9. Despite its simplicity, this mathematical problem, first formulated by Albert Tucker, is a prime example of game theory. Many different varieties of the game exist, and it can apply to topics such as nuclear warfare, population dynamics, and sociology. FTP, give the proper name of this problem, in which two robbery suspects must choose to cooperate or defect.

Answer: Prisoner's Dilemma (Do not accept anything involving cannibals)

10. This 1980 novel centers around a series of misadventures beginning with the protagonist's inexplicable arrest and his resulting recovery from the trauma of a drinking session with his mother. It continues to get even crazier. All the while, the main character corresponds regularly with a sex-crazed girlfriend in New York. FTP, name this Pulitzer Prize winning novel by John Kennedy Toole about the adventures of Ignatius J. Reilly.

Answer: A Confederacy of Dunces

11. He appears in three stories called the ratiocinative tales, the first of which is The Mystery of Marie Roget and works solely by using deductive method. In the second book of the series, he locates the title object, The Purloined Letter. He never works in any official capacity and has had many detectives modeled on him in other works of literature. FTP, name this detective who also appears in The Murders in the Rue Morgue, a creation of Edgar Allan Poe.

Answer: C. Auguste Dupin

12. This former director of the John D. and Catherine T. MacArthur Foundation died in 1995. In 1954, the Public Health Service organized an experiment in which nearly two million children in grades 1, 2, and 3 participated to test a vaccine that he created. Good thing his work panned out or many children might still be doomed to death or paralysis today. FTP, name the man who developed the first polio vaccine.

Answer: Jonas Salk

13. This Congressional Medal of Honor Winner parlayed his military success in the Civil War into a term as governor of Maine (no longer under the control of Massachusetts). He is also remembered for his valiant effort to hold the flank of Little Round Top. FTP, name this man, who is best known for his repulsion of Pickett's charge in the Battle of Gettysburg.

Answer: Joshua Chamberlain

14. Although his murderers tried to poison, stab and shoot him, they ended up having to bind him and throw him into the Neva River in order to do him in. His ability to hypnotize Prince Aleksey and control his hemophilia won him special favor with Czar Nicholas II and Empress Alexandra. FTP, name this mystic who contributed to the downfall of czarist Russia.

Answer: Grigory Yefimovich Rasputin

15. This scientist calculated the correction factors for the erroneous assumptions of the ideal gas equation. Awarded the Nobel Prize in Physics in 1910, his lifelong work concerned the study of the behavior of gases and liquids and weak forces of attractions between molecules. FTP, name this scientist for whom two types of intermolecular attractions are named.

Answer: Johannes van der Waals

16. She graduated from Smith College in 1956 and began working as a freelance journalist in India. In 1971, she helped found the National Women's Political Caucus, which encouraged women to run for political office. Her rather feminine looks had unenlightened journalists baffled about why she became a feminist in the first place. At one point, rumor also had it that she was dating Henry Kissinger. FTP, name this famous feminist and founder of Ms. Magazine.

Answer: Gloria Steinem

17. Expressed as three formulations of essentially the same principle, Immanuel Kant presented this important mechanism for determining the moral worth of human action. The first and most familiar formulation requires the maxim of action to be able to exist as universal law. FTP, what ethical concept, introduced in the Groundwork of the Metaphysics of Morals, is the moral alternative to the hypothetical imperative?

Answer: categorical imperative

18. LC circuits have this property, because the location of the current alternates between the inductor and the capacitor. Chemical compounds have it if more than one Lewis dot diagram can be drawn for them. Unfortunately, the Tacoma Narrows Bridge had it too. FTP, name this property, which in physics refers to the potential for vibrations of a given wavelength to excite sympathetic vibrations in an object.

Answer: Resonance

19. This deity's bliss was interrupted when her uncle kidnapped and raped her. Her mother grief at the loss caused brought on winter and only her 6-month return back to earth each year could bring back spring's warmth. If she hadn't eaten that pesky pomegranate, she'd have been able to stay out of Hades. FTP, name this goddess, featured with her husband in the Merchant's Tale in "The Canterbury Tales."

Answer: Proserpina or Persephone

20. They originally formed as an organization designed to survey police procedures and alert the local community to authoritarian abuses. Their mission broadened in scope and ambition though. For example, they started schools and breakfast programs and their demands included a separate homeland for African-Americans and retrial of black prisoners by a jury of their true peers. FTP, name this militant political organization founded by Huey Newton and Bobby Seale.

Answer: The Black Panther Party (ACC: Black Panthers)

21. In this Henrik Ibsen play, the heroine represents a modern woman who struggles against the subjugation of women in society. Although she forges a bank note signature to save her husband's life, he does not stand by her when she is caught. FTP, name the controversial play that marked Ibsen's "second phase," or transition from mythical and historical dramas to those that depicted social problems, starring Nora Helmer.

Answer: A Doll's House
