

ABSOLUTELY NOT!

Packet by Jon Pinyan

Some preliminary notes:

There is a theme to this packet. As such, some answers must be given in a specific form, and thus there may be unexpected or unusual prompts.

There are 27 tossups in this packet, with moderate adherence to a standard distribution.

I will admit: I spent more effort working on the structure of this packet than the content of this packet. I was never a great question writer, and both difficulty and quality may swing wildly.

Lastly: This is all meant to be in good fun.
